

Knowledge. Reliability. Service.

Small Team – Big Impact

Small Team - Big Impact. That's us: The BIOMED Labordiagnostik GmbH, an ISO 13485 certified company founded in 1976. Together in the team, we place great value on respectful cooperation. We are family-friendly, flexible and have fun at work.

Our customers appreciate our prudent and forward-looking actions and our knowledge in the IVD field acquired over decades.

Our customers include small and large laboratories in **human** and **veterinary** medicine in Europe and overseas. We serve them with Bavarian cordiality from our company headquarters in Oberschleißheim, a suburb of Munich.

Independent and reliable

ISO 15189 recommends independent third-party controls for accredited laboratories. As your ISO 13485 certified partner we offer you:

- **independent quality controls**
- **independent reagents & calibrators**

Biomed quality controls are available as **multi-analyte controls** for urine, CSF and serum and for single parameters. Our **CSF controls** are suitable for CSF and serum diagnostics as well as neurological examinations including oligoclonal bands. Calibrators with the corresponding reagent are available as set or stand-alone.

Our additional portfolio includes:

- **Point-of-Care Diagnostics**
- **Staining devices and staining solutions**
- **Devices and accessories for everyday lab work**
- **Products for laboratory hygiene**

Our IVD products can be used in the fields of clinical chemistry, hematology, pathology, histology, neurology, immunology and infectiology, both in **human** and **veterinary** medicine. Separate information flyers about our products are available as well.

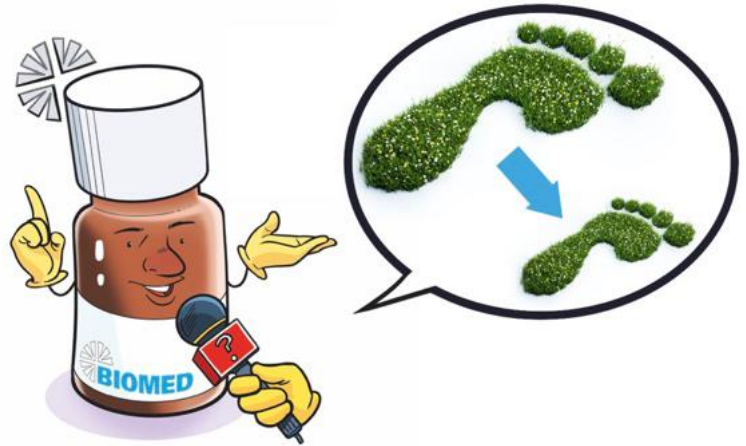

Knowledge. Reliability. Service.

Blue is the new Green

The color "Blue" in our logo represents safety, reliability and our Bavarian homeland. But it also stands for our environmentally conscious and sustainable actions.

We understand practiced environmental protection as an absolute necessity for the sustainable development of our society and protection of our future.

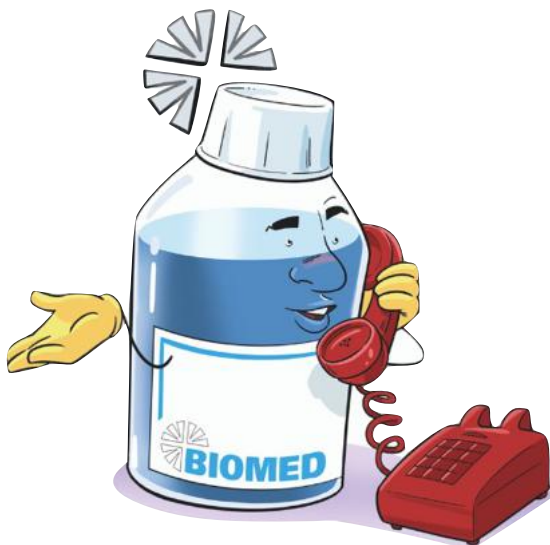

It is therefore with full conviction that we promote environmentally conscious thinking and action with the aim of saving resources and preventing environmental pollution. In line with the motto: "Blue is the new Green", we are therefore committed to the environment and replace, for example, styrofoam packaging with cardboard or have a tree planted for every Google evaluation.

Contact us
